

McCaslin Boulevard On- and Off-Ramp Restrictions Crosswalk Installations Nov. 16-21

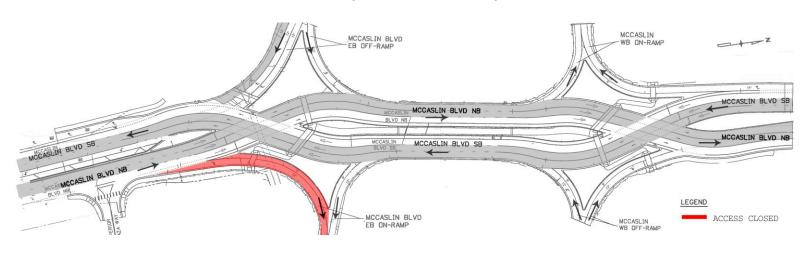

As part of the US 36 Express Lanes Project, work continues to complete the Diverging Diamond Interchange (DDI) by the end of this year. Crosswalk installations will be ongoing starting this week. This work is temperature-sensitive and must be performed during daytime hours and scheduled for days when temperatures are warm enough. Work is tentatively scheduled Nov. 16-20, 9 a.m.-3:30 p.m., and Nov. 21, 4 - 9 p.m., at the ramps listed and shown in red below. If temperatures are not warm enough, the work will be rescheduled for a day when they are. One ramp will remain open during the posted closures and installation. With the new Diverging Diamond Interchange (DDI) traffic patterns, motorists have a minimum of one ramp movement to choose if the direction of the advertised detour is not convenient. If work does not occur due to temperatures, it will be rescheduled for the following day.

Monday, Nov. 16, 9 a.m.- 3:30 p.m.

 Westbound US 36 off-ramp to northbound McCaslin (Westbound US 36 off-ramp to southbound McCaslin remains open)

Wednesday, Nov. 18, 9 a.m.- 3:30 p.m.

 Northbound McCaslin Boulevard to eastbound US 36 on-ramp (Southbound McCaslin Boulevard to eastbound US 36 on-ramp remains open)

Friday, Nov. 20, 9 a.m. - 3:30 p.m.

 Southbound McCaslin Boulevard to westbound US 36 on-ramp (Northbound McCaslin Boulevard to westbound US 36 on-ramp remains open)

After the concrete has set on the crosswalks, the ramps will be reopened, possibly earlier than the posted times. Detours will be clearly marked and in place. RTD bus routes will not be impacted. Lanes and ramps not in red will be fully operational and accessible. We appreciate your patience while we work toward finishing the McCaslin Boulevard DDI. We understand that closures are an inconvenience to drivers and businesses in the area. For more information, go to www.us36expresslanes.com or call the project hotline at 303-404-7042.
